who am i?

I'm an aspiring mathematical philosopher and data scientist. I combine Mathematics, Philosophy, and coding, bridging the gap between **logical foundations** and **modern applications**, making me a unicorn that can tackle deep conceptual and complex practical problems such as those on the frontiers of science and industry — from theory to new technologies.

*Here "core" refers to Linear Algebra, Probability Theory, etc.

experience

2021 — 2025 fellowship	Undergraduate Research Fellow I'm studying logical foundations of physical theories under the supervision of Prof. Jonas R. Becker Arenhart in the Research Group in Logic and Foundations of Science at UFSC. Funded by the PIBIC/CNPq undergraduate research program. Research / Logic / Philosophy of Science / Philosophy of Physics / LaTeX	Universidade Federal de Santa Catarina
2019 — 2021 fellowship	Undergraduate Teaching Assistant Provided academic support for undergraduate students, focusing on topics such as Peano axioms, elementary Number Theory, methods of proof or, more broadly, logical reasoning. Funded by the UFSC undergraduate tutoring program. Teaching / Logic / Number Theory / Storytelling / Social Responsibility	Universidade Federal de Santa Catarina
2013 — 2014 part-time	Web Designer End-to-end development of responsive websites, using Bootstrap to build custom WordPress themes. Implemented third-party plugins like WooCommerce for e-commerce solutions. Adobe Creative Suite / WordPress / SQL / PHP / Bootstrap / HTML & CSS	Aidos Tecnologia

education

begins 2026	Master's degree in Logic and Foundations of Science	Universidade Federal de Santa Catarina
2024 — 2027	Bachelor's degree in Philosophy (GPA: 9.50/10) Building on my background in Mathematics, here the main focus is on acquiring more analytical and conceptual tools to conduct frontier research in the foundations of the sciences. Logic / Philosophy of Science / Philosophy of Physics / Artificial Intelligence	Universidade Federal de Santa Catarina
2018 — 2023	Bachelor's degree in Mathematics (GPA: 8.98/10) Emphasis on the mathematical foundations of the sciences. The degree was earned through a 756-hour special honors track and my final project was about Stone Duality, a category-theoretic theorem, co-supervised by Prof. Luiz G. Cordeiro and Prof. Jonas R. Becker Arenhart. I also took many extra courses, e.g. many Philosophy courses, Analytical Mechanics, Introduction to Python Programming, Quantum Computing, Quantum Chemistry, Non-Classical Logics, History of Logic, Metalogic, and Semantics, to name a few. Logic / Category Theory / Mathematical Physics / Scientific Computing / Python	Universidade Federal de Santa Catarina

hobbies

Writing is my passion. So, I seek to articulate what I learn into materials that may one day become blog articles or books.

non-profit

Whenever possible, I get involved in projects aimed at disseminating science, to a general audience, with a philosophical twist.
